

W9124QDRONESYS, Drone Formation Control System (DFCS)

FAR 52.212-2 Evaluation—Commercial Items (Jan 1999)

(a) The Government will award a contract resulting from this solicitation to the responsible offeror whose offer, conforming to the solicitation, will be most advantageous to the Government, price and other factors considered. The following factors shall be used to evaluate offers:

Delivery capability of the units is the most important evaluation factor. You shall provide satisfactory evidence that components parts required for the units will be readily available in order to meet the eight month delivery schedule. Non-compliance with delivery schedule will require the company to provide compensation to the government for the delay.

Technical capability of the company shall conform to the requirements set forth in the Drone Formation Control System (DFCS) attachment located on our webpage cited on the solicitation/synopsis. You must provide, in detail, your off the shelf equipment and what modifications will be made to meet the government specifications. You shall provide a summary of your productions in the past two or more years and how they relate to the requirement in this paragraph. You must identify any performance requirement that you are unable to meet. Technical will be on a go no go basis.

Past performance is the next factor. You shall supply the name and telephone number of at least two other customers to whom you supplied drone formation control systems.

Price is the least important factor. You shall enter your firm-fixed-prices on the supplied bid schedule.

Delivery, technical and past performance, when combined, are significantly more important than price. When the proposals have been evaluated, a competitive range will be established consisting of those contractors who have a likely chance of getting the award. Technical experts will evaluate each of those contractors in the competitive range and based on the following criteria will rank the contractors:

- Delivery
- Technical Capabilities
- Past Performance
- Price

(b) *Options.* The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. Evaluation of options shall not obligate the Government to exercise the option(s).

(c) A written notice of award or acceptance of an offer, mailed or otherwise furnished to the successful offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified
